Are your medicines working for you?

We are inviting you to a structured medication review appointment about your general health and to talk about your medicines.

We would like you to read these questions and think how they apply to you.

Do you think your medicines are improving your health, or stopping you from getting worse? If so in what way are they working?

When was the last time you didn't take at least one of your medicines? Why was this?

Have you experienced any unwanted side effects from your medication? If so, what have you noticed?

Your (telephone) appointment is date at time (at (insert surgery details))

The review may take up to 30 minutes

Please reply to the text message or contact the surgery to let us know if you would like to have a telephone appointment or prefer face to face appointment at the surgery.

If possible please bring your medicines with you to the appointment/have all your medicines in front of you when we call.

A family member, friend or carer is welcome to be part of your review especially if they help you with your medicines.

Please contact the practice if the time or day of the appointment is not suitable and we can rearrange.

Many thanks
